Suggested Formula: Sulfamethoxazole 40 mg/mL, Trimethoprim 8 mg/mL Oral Liquid (Suspension, 150 mL)
**SPECIAL PREPARATORY CONSIDERATIONS**

**Ingredient-Specific Information**

*Light Sensitive (protect from light whenever possible):* Sulfamethoxazole, Trimethoprim

**Suggested Preparatory Guidelines**

- **Non-Sterile Preparation**
- **Sterile Preparation**

**Processing Error / Testing Considerations:**

To account for processing error considerations during preparation, it is suggested to measure an additional 5 to 9% of the required quantities of ingredients.

**Special Instruction:**

This formula may contain one or more Active Pharmaceutical Ingredients (APIs) that may be classified as hazardous, please refer & verify the current NIOSH list of Antineoplastic and Other Hazardous Drugs in Healthcare Settings, 2016. *General Chapter <800> Hazardous Drugs – Handling in Healthcare Settings* was formally published February 1, 2016 in the First Supplement to USP 39-NF 34 and has a delayed *official implementation date of December 31st, 2019.*

This formula must be prepared within the appropriate facilities under adequate environmental conditions, following the necessary guidelines and procedures as stated within *USP 795* and *USP 800,* when handling hazardous drugs. Only trained and qualified personnel must prepare this formula.

All required personal protective equipment (hazardous if applicable), such as but not limited to, lab coat, protective sleeves, gloves both inner and outer if applicable, dedicated shoe covers, hairnet, beard cover, eyewear, appropriate face mask, respirator and face shield, etc., where applicable must be worn at all times.

If applicable, follow all required procedures for hazardous drug handling including but not limited to procurement, transport, storage, preparation, dispensing, administration, clean up (spills) & disposal.

If you are a registered 503B facility, please refer to all relevant guidance documents including but not limited to the Code of Federal Regulations (CFR), Guidance for Industry (GFIs) and Compliance Policy Guides (CPGs).

This procedure requires the use of very small quantities of ingredients. All calculations and preparation techniques must be verified before dispensing the final product.
SUGGESTED PREPARATION (for 150 mL)
Weigh and / or measure the following ingredients when appropriate:

§ Weigh / measure just prior to use.

Preparatory Instruction

1. **Powder-liquid preparation:**
   
   **A.** Combine and triturate the following ingredients together to form a fine, homogeneous powder blend:
   
   - Sulfamethoxazole
   - Trimethoprim

   **B.** Levigate the fine, homogeneous powder blend (Step 1A) with the Oral Mix (Flavored Suspending Vehicle) (8.0 mL plus processing error adjustments).

   End result: Homogeneous paste-like dispersion.

2. **Powder-liquid integration:**
   
   **A.** Incrementally add the homogeneous paste-like dispersion (Step 1B) to the Oral Mix (Flavored Suspending Vehicle) (120.0 mL plus processing error adjustments).

   Specifications: Continuously mix.

   End result: Homogeneous liquid-like dispersion.

3. **Filling to volume:**
   
   **A.** Add additional Oral Mix (Flavored Suspending Vehicle) to the mixture (Step 2A) to fill to the required batch size (150.0 mL plus processing error adjustments).

   Specifications: Continuously mix.

   End result: Homogeneous liquid-like dispersion.
### 4. Product transfer:

Transfer the final product into the specified dispensing container (see “Packaging Requirements”).

**Note:** Continuously mix the final product during the transfer process in order to maintain homogeneity.
